

Education

MPSTME, NMIMS University	2022 - 2026
B. Tech Computer Engineering	
CGPA: 3.40/4.00	
Mount Litera Zee School	2022
CBSE: 83.57 %	
Centre Point School	2020
CBSE: 92.20%	

Projects

Email Classification System - 2024

Developed an email sentiment analysis model using NLTK and TF-IDF. Trained and compared Decision Tree, Naive Bayes, and Random Forest models, selecting Random Forest for its superior accuracy. Introduced a custom "Happiness Quotient" metric to summarize overall sentiment trends effectively.

AI Based Background Replacement System- 2024

Built a real-time background replacement app using Python and OpenCV. Used frame differencing and binary masking for accurate foreground detection and virtual background overlay. Enhanced privacy and professionalism in virtual meetings, with broader use in content creation and e-commerce.

Society Management System - 2024

Built a full-stack Society Management System using Flask, MySQL, and Bootstrap with role-based access for key roles. Enabled secure parcel coordination between guards and residents, improving delivery flow. Integrated flat listing and filtering to connect tenants directly with the Secretary, removing brokerage.

Book Recommendation Website – 2024

Developed a book recommendation website that suggests books to users based on their preferences, genre, and interests. Implemented a user-friendly interface and recommendation logic to personalize suggestions and enhance user engagement.

Internship

HNT Foods Pvt Ltd – May – July 2025

As a Web Developer Intern, I built two business websites using AI tools like Dora AI, Durable, and Google Stitch. Designed a corporate site to highlight HNT Foods' food grain operations and a Gen Z-focused site for media brand Kreare to drive brand collaborations.

Blive Music – Aug – Nov 2024

Served as company ambassador at premium venues including Bastian, establishing brand presence and fostering client relationships. Collaborated with Divyansh Rana on influencer marketing campaigns, facilitating strategic brand partnerships and promotions.

Fefria Ltd May-Jul 2024

Co-developed comprehensive residential management software from conception to deployment. Led requirements analysis and backend development, implementing key modules for resident profiles, maintenance tracking, and visitor security. Delivered reliable system meeting all project deadlines and specifications.

Certifications & Publications

Full stack Web Development – Udemy - 2025
